

## Detour Delay Cost:

Should the detour exceed the allowed time for the highway closure, the County Engineer will implement a Vehicle Delay Cost that will factor in the road mileage, motorist delay time on a per day basis for every additional day the detour is in place (see formula below). The Vehicle Delay Cost shall be paid to the Kane County Div. of Transportation within ten working days of the roadway being opened to traffic.

Vehicle Delay Cost =  $\$0.12 \times \text{ADT} \times \text{D} \times \text{L}$  where,

\*ADT is the average daily traffic as determined by the County Engineer

\*D is the Duration of the proposed detour in days

\*L is the total length of the detour in miles
