## ***Overnight Crack Sealing on Randall Road Set to Begin August 12th***

August 9, 2024 - Night time pavement crack sealing on Randall Road is scheduled to begin the week of Monday August 12th, between Gyrr Ave and US Route 20 and is anticipated to be completed in one week, weather permitting. The night work on Randall Road will be executed from 8:00 pm until 5:00 am, Monday through Friday, in order to reduce daytime traffic impacts and to better serve the motoring public. Please give extra attention to directions given by flaggers and watch for equipment, as temporary lane closures and trucks entering and leaving live traffic lanes will occur during the work.

Motorists need to be prepared to reduce their speed, exercise caution, and be extra alert. Motorists should expect delays while traveling through the work areas. Motorists may want to add additional time to their commutes and consider the use of alternate routes while this work is being completed.

The Crack Sealing program is part of the County's comprehensive road maintenance program to increase the longevity of the roads by sealing road cracks, preventing water from penetrating the road base and reducing the life of the pavement.
